Hello Business Minded People!

Laraun Josey here and I am extremely excited that you've decided to learn more about protecting and growing your business.

For over 17 years, I have been helping numerous business owners protect and grow their business.

In the first few years of business, small companies come up against a lot of issues. Some are harder than others to overcome — and, according to the U.S. Bureau of Labor Statistics, *about 20% of small businesses fail by the end of their first year*. By the end of their fifth year, 50% go under; and by the tenth year, **that number rises to 80%**. With those survival rates, it's easy to see why business owners face the first few years of business with apprehension. But, many common business problems are **fixable**. I came up with 12 issues that all business owners face in their business at some time.

Here is a survey that you can use to assess your business.
